

MEDICARE-FUNDED CONFERENCING FOR GPs

Access the MDT you need to break the chronic disease cycle

Your patients need a strong support team. Now there's a way to deliver solutions that stick – without the administrative drain.

GPs spend hours every week on coordination with specialists that isn't billable, isn't efficient, and often isn't effective. Referral letters sent into the void. Phone calls that never quite connect. Specialists letters that don't add up.

But now there's a better way – and **Conference Care facilitates it for you!**

💡 Did you know?

There are now **generous Medicare rebates** available to fund GPs directly for participating in virtual case conferences with specialists and allied and health clinicians – making multidisciplinary care more practical than ever.

If you are not currently claiming them to help improve your patient outcomes, Conference Care is the solution for you.

Who's Eligible?

Any patient with a chronic disease qualifies – and each patient can have up to 4 case conferences per year.

Conditions commonly conferenced:

- Diabetes
- Chronic pain
- Cardiorespiratory disease
- Mental health
- Geriatric care
- Palliative care
- Stroke recovery
- And other chronic diseases...

I cannot speak highly enough of Conference Care. The clinical expertise is invaluable, the team makes it incredibly easy, and the technology is accessible and effective.

Dr Maureen Krasnoff
Lockridge Medical Centre

Our job is to make it easy for you...

You do three things:

1. Tell us the patients' issues you want to discuss
2. Tell us your available times
3. Join the call – from wherever you are. Home, office, on the commute.

We handle everything else:

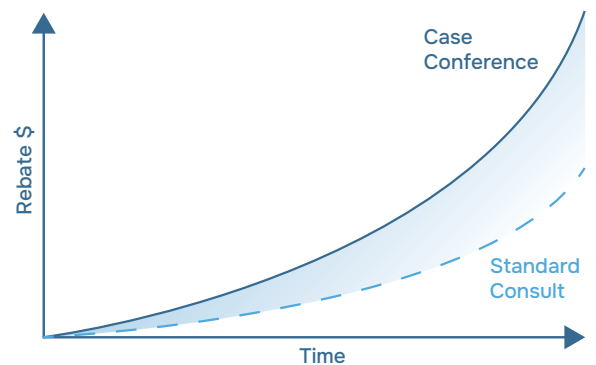

- Coordinate and schedule your weekly case conferences
- Connect specialists and allied health clinicians with you
- Provide the secure, virtual online meeting room
- Obtain the necessary patient consent
- Prepare Medicare-compliant documentation

The Benefits Stack Up

Case conferences are rebated at higher rates than standard consults – and the gap adds up, fast.

An hour of case conferencing generates **\$434.70** – outperforming standard consults whether you bulk bill, mixed bill, or privately bill. And the benefits compound.

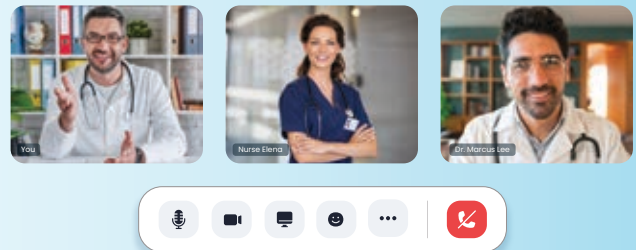

Fully utilised, the average GP can generate **over \$130,000 in annual billings** – at higher Medicare rebates than standard consults.

Work From Anywhere

Conferences are conducted virtually – meaning you're not tied to a consultation room, or even the practice.

Run a conference from home, between appointments, or wherever suits you. The earning potential travels with you.

Beyond the Billing

Better patient outcomes

Chronic disease patients managed by a coordinated multidisciplinary team see measurably improved results: clearer care goals, fewer gaps, and less chance of conditions compounding over time

Deepen clinical insights

Conferences serve as a collaborative learning vehicle, providing new clinical insights and ongoing professional development for all participating clinicians

Strengthen referral networks

Build real working relationships with allied health clinicians you trust through regular collaboration. Assemble the right team for each individual patient. Deliver healthcare that hits the mark.

Who We Are

Established and run by a team of GPs, clinicians and health industry professionals, Conference Care was created to help you harness the full potential of coordinated healthcare.

Ready to Get Started?

It never costs you a thing. We take care of all the setup and coordination. You and your patients benefit long-term!
