

ZERO-COST MEDICARE-FUNDED
CONFERENCING FOR PRACTICES

\$180,000*

extra revenue, per year

No new appointments.
No admin burden.
Free for practices & GPs

New Medicare item numbers reward GPs for the multidisciplinary coordination they already conduct informally. Conference Care turns it into practice revenue – with zero admin on your side.

* All figures herein are conservative estimates for the average practice with 6 GPs running 2 hours of case conferencing per week. The reality is often much higher for practices with a high chronic disease load.

Most practices are leaving six figures per year on the table.

Your GPs already coordinate care for their complex chronic disease patients.

Phone calls to specialists. Chasing letters.
Re-explaining the plan to allied health.
None of it is billable.

Medicare now funds this work properly – but only when it's run as a structured clinical case conference.

\$434.70 per hour

Medicare rebates – higher than a standard consult

We coordinate the conferences for busy GPs, removing every organisational and technical burden from your team.

“Conference Care has transformed case conferences from a frustrating task into a streamlined, high-value process. Their handpicked allied health team is excellent – and as GPs, we can't do it all.”

Dr Mithun Sri Ganeshan

Practice Principal / Owner, Bayswater GP

WHAT THIS CHANGES

For your practice

- **Revenue without overhead.**

\$30,000 per GP, per annum on average*
– higher rebates, no new patient load.

- **Zero admin burden.**

We handle recruitment, scheduling, consent, documentation, and Medicare compliance.
Your team just bills.

- **GP retention.**

Chronic patients with a coordinated team behind them follow their plans, keep their appointments, and stick with the practice. They're the most valuable patients on your books.

- **Medico-legal protection.**

Every conference generates a Medicare-compliant audit trail automatically – named specialists, recommendations, consent timestamps.

- **Better patients.**

A high-value income stream GPs enjoy – run from home, between consults, or on flexible days.
A real reason to stay.

No contracts. No lock-in. No risk.

Enjoy the value. Pay nothing.

HOW IT WORKS

Revenue scales with every GP you onboard.

Based on 30% of Medicare billings retained by the practice and 2 hours of case conferencing per GP per week.

ELIGIBILITY

Any chronic disease patient qualifies – up to 4 conferences per patient per year.

Stroke recovery

Geriatric care

Cardiorespiratory

Diabetes

Chronic pain

Mental health

Palliative care

Who does what?

Your practice does three things:

1. Tell us which GPs want to participate
2. Book them in at a time they select
3. Bill Medicare

Conference Care handles everything else:

- Recruits specialists and allied health
- Builds the right team around each patient
- Schedules every conference
- Obtains and records patient consent
- Prepares Medicare-compliant documentation
- Provides the conference summary for upload

"I cannot speak highly enough of Conference Care. The clinical expertise is invaluable, the team makes it incredibly easy, and the technology is accessible and effective."

Dr Maureen Krasnoff — Lockridge Medical Centre

WE'VE MADE IT EASY FOR YOU

Get started in three simple steps...

1

Start small, see the value.

One GP, one complex patient, 20 minutes. No pressure, no contract, no setup.

2

Roll out across the practice.

We onboard your GPs to our online portal— no IT integration, no learning curve.

3

Bank the billings.

Your GPs bill the item numbers, you see the revenue. Then we help you optimise.

READY TO GO?

Run your first conference.

We'll walk you through the platform, run the revenue numbers for your specific GP headcount, and set up a single-patient conference at a time that suits one of your GPs.
